

About

CORG is an Internet based service capable of handling all technical and scientific aspects and a number of practical arrangements for organizing conferences, symposia and workshops.

SuviSoft specializes in information technology solutions and services for the organization of scientific and technical events involving processing of multi-authored documents.

Through its network-based Conference ORGANizing (CORG) services, SuviSoft offers associations, event organizers and publishers an end-to-end turnkey solution for a professional event management.
