

Browsing the Conference Content

The content of this conference is organized in several different ways for a simple and efficient browsing:

1. Sessions

Papers are grouped based on their presentation sessions.

In one session by clicking on the paper title you go directly to that paper. Clicking on (Abstract) you will go to a page where you can find out more info about that paper: authors with their institutions and countries and also the paper abstract.

2. Authors

2.1 Authors by letter

Authors are grouped based on the first letter of their last name.

2.2 All authors

All authors with their institutions are grouped in a single document. This document is extremely usefull on platforms where the Acrobat Search engine is not available, like for example Linux. Here it is possible to use Find command from the Edit menu to search for author names.

3. Papers

3.1 Papers by Session

(see Section 1)

3.2 All Papers

All papers with their title and authors are grouped in a single document.

They appear in the order in which they have been submitted to the conference.

This document is extremely usefull on platforms where the Acrobat Search engine is not available, like for example Linux. Here it is possible to use Find command from the Edit menu to search for words in the title of the papers or for author name.
