

## The Search Functionality

### Hint

In the "Search" page hold the mouse over the buttons or the text input field to see a short description of its functionality.

### Quick searches

Specific searches can be performed writing the query in the text field and then pressing the desired "GO" button

### Search is performed as follows:

- Papers: search in full papers content
- Abstracts: search in abstract content, paper title, authors, country, organization
- Sessions: search in session names, paper titles
- Topics: search in topic names, paper titles, author names
- Organization: search in organizations
- Country: search by countries
- Paper ID: search the numeric ID of the paper
- Title: search in paper titles

The Acrobat Search engine understands a complex query language.
